- Scikit-learn

Deep Learning:

- TensorFlow, Keras, PyTorch

Generative AI:

- Hugging Face Transformers,
LangChain, OpenAI API

Agentic AI:

- LangGraph, LangChain, CrewAI, n8n

Certifications

- FULLSTACK WITH AI
- FULLSTACK WEB DEVELOPMENT (MERN)
- COMPUTER HARDWARE & NETWORK PROFESSIONAL

CAREER OBJECTIVE

Motivated and results-driven AI Full Stack Developer with hands-on experience in frontend technologies (React, HTML, CSS, JavaScript), backend (MongoDB, Node.js, Express.js), and AI skills (Data Science, Machine Learning, Deep Learning, Generative AI, Agentic AI). Currently completing a comprehensive AI Full Stack course covering Machine Learning, Deep Learning, Generative AI, and Full Stack Web Development. Passionate about building intelligent and responsive web applications that bridge AI and user experience.

WORK EXPERIENCE

AI Engineer — NexSkil

jun - 2025

Arfa Software Technology Park Lahore

PROJECT HIGHLIGHTS

- U.S. Housing Price Analysis — Used Pandas & Seaborn for visualization, discovered key trends.
- Fast Food Restaurant Mapping — Analyzed distribution trends using Python & Seaborn.
- Startup Funding Analysis — Built time-series visualizations to reveal investor and sector trends.

PROJECTS (Agents Built)

- Web Search Agent (DuckDuckGo)
- Weather Finder Agent (Weather API)
- Long-term Memory Agent (MongoDB)
- FashionHub Customer Support Assistant
- SerpApi Web Search Agent
- Pizza Hut Customer Support Chatbot
- Personal English Tutor
- My Shadow AI Agent
- MailSender Agent
- ML/DL GitHub Projects

Web Engineer — WEBDEVERS

sep 2024 - 2025

IT Tower near Hafeez Center Lahore

- Designed and developed scalable full-stack web applications using React.js, Node.js, and MongoDB.
- Built secure authentication systems and optimized form validations, improving usability and security.
- Integrated REST APIs and enhanced data flow between frontend and backend, reducing load times.
- Created reusable UI components with React, ensuring consistency and faster development.
- Collaborated with teams using Git/GitHub and deployed projects on Vercel & Netlify for rapid delivery.
- Applied best practices in responsive design and cross-browser compatibility to boost user experience.
